# Chapter 2 - PDF Tools

Use PDF tools to quickly complete common operations such as PDF merging, extracting, converting and more.

## PDF Tools

## Other

1. Convert
2. Edit pages
3. Merge PDFs into one
4. Extract PDF pages
5. Save PDF as flattened copy
6. Set/Remove passwords
7. Convert image to PDF
8. Convert PDF to image
9. Remove all annotations
10. Transfer files via WiFi
11. Print PDFs
12. Share PDFs

# Chapter 3 - How to Utilize Annotation Tools

PDF Reader Pro provides a full set of annotating tools. Once you select, you can annotate continuously.

## 1) How to Annotate

 **Anchored Note** | This tool allows notes to be added to your document as comments. Notes are life savers when it comes to cross referencing and adding contextual knowledge. Select the tool, then click where you want to add a note and it will pop up right there.

    **Text Markup** | Select tools (**Highlight**, **Underline**, **Strikeout**, **Squiggly**) and tap to change the color and opacity.

 **Freehand Drawing** | Add freehand drawings by hand writing and tap to change **Color** / **Opacity** / **Thickness** / **Brush Size**.

 **Shapes** |Select the shape tools (**Circle, Rectangle, Arrow and Line**). Pick the shape, color and other options. Then click and drag it anywhere you want.

 **Text Box** |Click on any place in the document and start typing, and tap to change font and style.

 **Signature** |Add legally binding signatures to documents. Choose the tool, either select signatures or add a new one. Then click where you want to put the signature in the document.

 **Stamp** |Select the tool and customize stamps.

 **Audio** |Add audio notes anywhere in your PDFs.

 **Image** |Insert a picture into your document.

 **Link** |Redirect a text or an area to needed destinations by Pages, URL and Email.

## 2) How to Save Annotations

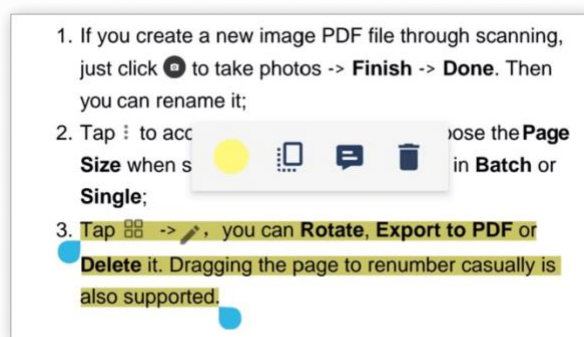

If your files are saved in the local, just do as below:

1. Enter the reading page, make comments to change your PDF files. All your changes will automatically save in the file.
2. Or you can tap  and choose **Save** button, then your changes will be saved.
3. Or tap **Exit** button, then your changes will be saved.

If your files are from the third app like email, you should download it first, and then you can search it in **Local**.

## 3) Delete Annotations

1. Turn off the annotation tool you are currently using;
2. Tap on the annotation and choose  from the pop-up menu bar to remove it.

3. Or you can tap to reveal **AOB**, then batch delete annotations in the list of **Annotation**.
4. If you want to remove all annotations, you can tap  and choose **Remove All Annotations** button.

## 4) Stamp

Add special stamps to your PDF files:

1. Enter the reading page, and tap ;
2. Select **Standard** to get an ordinary text stamp, such as APPROVED, FINAL;
3. Choose **Custom** to create a customized **Image Stamp** or **Text Stamp**;
4. Put the stamp into the file by clicking where you want it to be;
5. The customized stamps will be stored. If you don't need them, just click  to delete them.

## 5) Audio

Add audio notes to your PDFs:

1. Access to the reading page, and tap ;
2. Select  to start the recording;
3. Click to Play, Share, Save as or Delete.

## 6) Image

Inset images into the file:

1. Go to the reading page and tap  ;
2. You can **Use Camera** or **Photo** to get an image;
3. Then click where you want it to be;
4. If you want to remove the image, just click it and choose **Delete**.

## 7) Link

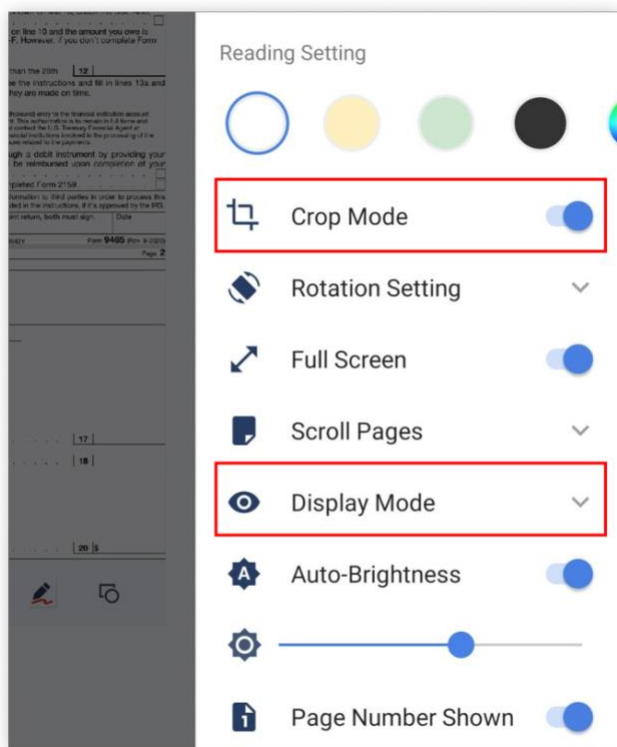

You can direct and redirect the pages by setting and editing the link:

1. Go to the reading page, and click  ;
2. Then select the texts or an area you want to add link;
3. Set hyperlinks by **URL / Page / Email**;
4. You can edit the link. If you don't need it, just click the link area and choose **Delete**;
5. If you want to change the destination, just click the link area and select **Edit**.

# Chapter 4 - How to Set Different Display Mode

PDF Reader Pro supports all kinds of display mode, you can choose any suitable mode to read, annotate, edit, sign, convert, and so on.

## 1) Display Mode

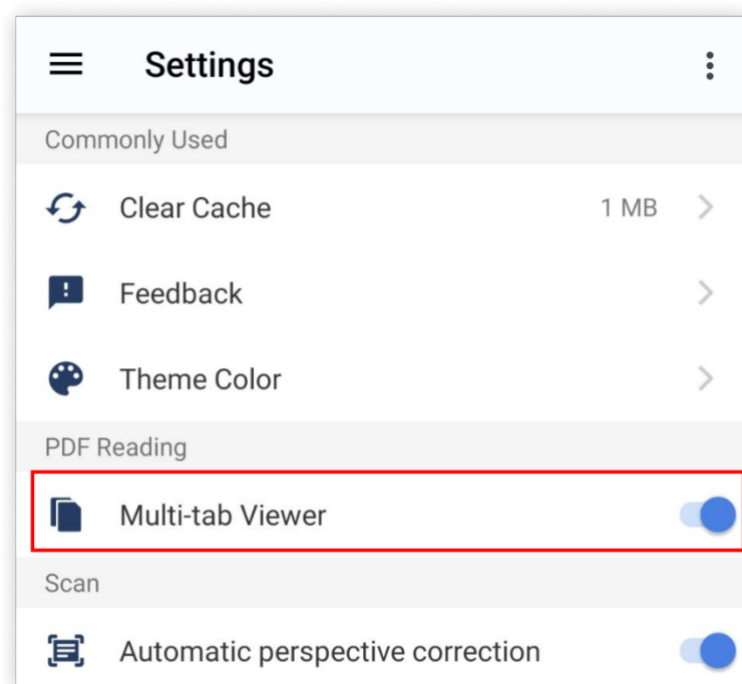

Everyone has their own reading habits; you can choose with the following mode:

1. Go to the reading page, and click  ;
2. Then you can choose Crop Mode On/Off;
3. Also, you can change **Display Mode** with Single Page, Two Page and Book Mode.

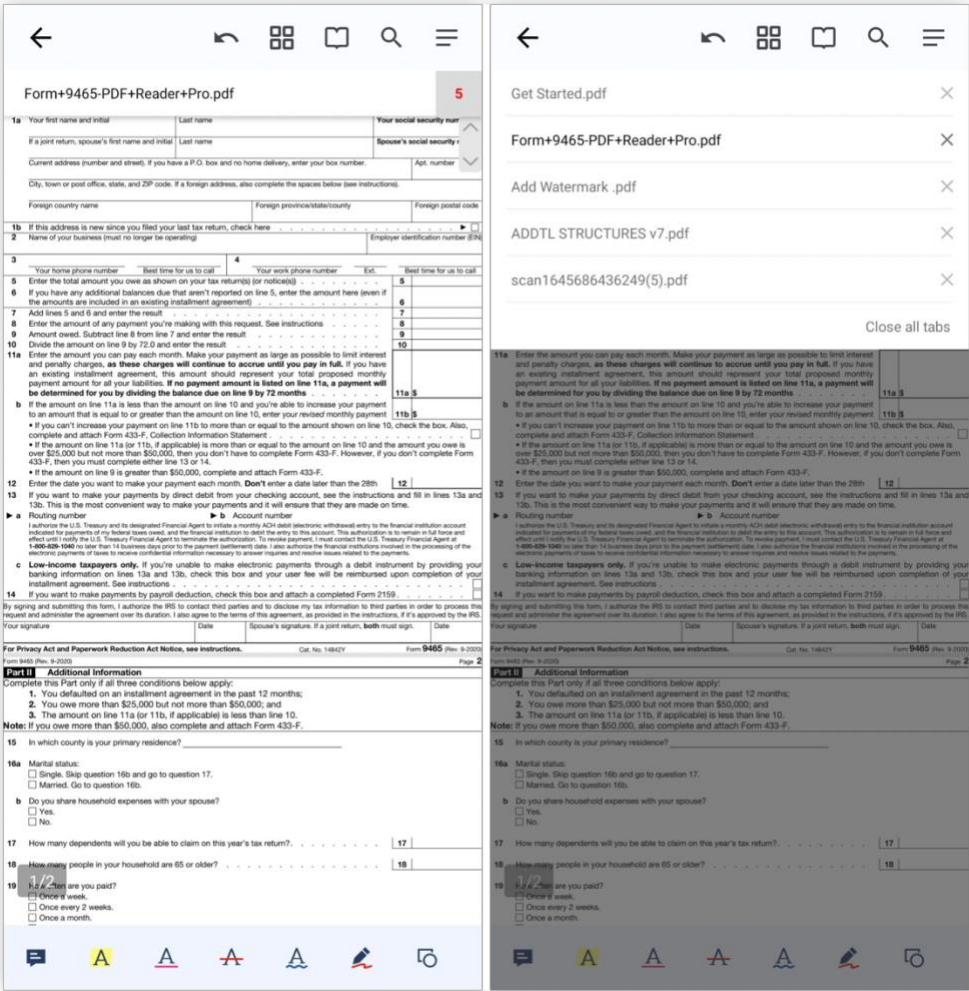

## 2) Multi-tab Viewer

If you want to deal with multiple PDFs at the same time, you can set Multi-tab Viewer:

1. Launch PDF Reader Pro and click ≡;
2. Then choose Settings, under PDF Setting is Multi-tab Viewer;
3. Click to switch On/Off Multi-tab Viewer;

4. Then access multiple PDF documents (at most 5 PDFs) , easily switch between open documents.

## Chapter 5 - Fill out Form

Fill out forms is a key requirement for any PDF editor. **PDF Reader Pro** helps you to complete tax forms, applications or other PDF forms with interactive fields such as text fields, checkboxes, radio buttons, combo boxes, list boxes and etc.

1. **Text field** – just click on the field to start typing;
2. **Checkbox and Radio Button** - check the appropriate box to make your choice;
3. **List box and Combo box** – choose form item text, making it more flexible to your form;
4. **Button** - trigger actions for these buttons to print, send email, or reset your form.

**Dynamic XFA forms are not currently supported in PDF Reader Pro for Android.**

What functions in PDF Reader Pro do you use ?

<input checked="" type="checkbox"/> Highlights	<input checked="" type="checkbox"/> Text Notes
<input checked="" type="checkbox"/> Signatures	<input checked="" type="checkbox"/> PDF Forms

How did you hear about PDF Reader Pro?

Your Name

Anything else you may say:
