Discuss the use of digital storytelling in the teaching and learning of language and critically report on one journal article that investigates the use of digital storytelling in the language-learning context.

Digital storytelling is aided by various available technologies and software packages that enhance, develop, and produce it. Consequently, the way digital stories are created may vary according to this constantly changing digital technology (Alexander, 2011) and the wide variety of supporting software. Windows Movie Maker (<https://www.windows-moviemaker.org/>) is already installed on many computers and, if not, can be downloaded for free.

Draw freely and annotate PDFs with ink, lines, arrows, squares, and circles.

Digital storytelling is an attractive educational aid because it “captivates and engages” (Stanley & Dillingham, 2011, p. 24) learners and helps develop artistic, technical, organizational and storytelling talents in students (Ohler, 2005).

«» Digital storytelling has the potential to influence the student audience and help them ‘make better meaning’ from the content they are exposed to. This report will discuss the potential and limitations of digital storytelling along with some fundamental technical information. It will then focus on one journal article that investigates the use of digital storytelling in language learning contexts.
